

TRANSITION RESOURCES, SUPPORT & HEALTH CARE

Call **775.786.4673** to become a patient and learn more about our gender and sexual health services.

At HOPES, we welcome and support all members of the community by providing comprehensive, inclusive LGBTQ+ healthcare services and community outreach and education. With access to a case manager and care team specific to gender-affirming care, transgender and gender-affirming patients can access the resources they need to live well. Together, we can create a strong LGBTQ+ network that connects people, solves problems, and builds a healthier Northern Nevada community.
